Lumber Grading course – 2026

Novice to experienced levels

5-day course

Designed for

Lumber graders, quality control technicians, and anyone in the industry interested in improving their understanding of lumber grading

Objective

The Lumber Grading course provides participants with a deep understanding of the principles and practices of lumber grading, empowering them to interpret and apply lumber grading standards and codes, ensuring accurate and consistent grading practices.

What you'll like

- Hands-on exercises with full-length boards
- Hands-on grading techniques
- Lumber grading reference guide included with course
- Course taught by professionals with multiple years of grading experience

What you'll learn

- Wood science
- Lumber grading theory and rules with practical application

Benefits

- Enhanced expertise: Provides in-depth knowledge of wood characteristics, defects, and grading rules, making participants experts in assessing and categorizing wood products accurately
- Improved product quality: Grading skills acquired in the course enable participants to select and sort lumber based on its quality, resulting in higher-quality products and reduced waste
- Quality control: Empowers participants to contribute to the establishment of robust quality control processes, reducing errors and increasing overall production efficiency

2026 classes

March 16 • June 1 • October 19
