Leading the learning revolution in our industry

PLC course – 2026

In-class learning

Basic and advanced levels

5-day course

Designed for

Controls personnel that have a basic understanding of PLCs

Objective

Learn the basic structure of our standard programming, as well as the standard features of the user interface to facilitate operation and troubleshooting. Gain a complete understanding of the controls process. Learn the use and function of all PLC components.

What you'll like

- Hands-on learning module for troubleshooting and tips to reduce downtime
- Advanced techniques to improve specific machinery throughput and troubleshooting
- Focus on higher level PLC programming logic and development
- Calibration procedures and equipment set-up for sawmill, kiln, and planer equipment through hands-on learning

What you'll learn

- Basic structure of Comact's PLC and HMI programs that can be applied to any area of the mill
- Troubleshooting techniques and tips to reduce downtime

Benefits

- Reduce downtime with fast troubleshooting reflexes and shortcuts in case of problems
- Increase throughput with advanced techniques
- Facilitate the setup of the background parameters
- Improve your ability to tune the RMC axis
- Reduce equipment wear and tear with improved maintenance skills

2026 classes

January 12 • March 2 • May 18 • July 20 • September 21 • November 2
