COMACT™

Reliability program

Your team. Your success. Built together.

Our Reliability program is a key component of Comact's EverBlue™ offering, designed to strengthen your mill by enhancing operational and maintenance practices, as well as team capabilities. Through targeted assessments and tailored improvement plans, we help increase reliability, reduce downtime, and deliver measurable performance gains.

OUR ASSESSMENT COVERS

- Maintenance routes, communication, and CMMS efficiency
- Machine asset health and maintenance practices
- Critical parts inventory and optimization opportunities
- Training needs (from beginner to advanced)
- Downtime and productivity analysis at all stages of production

A PRESCRIPTIVE, OUTCOME-FOCUSED APPROACH

We combine Comact's deep equipment expertise with your team's operational knowledge to build a sustainable model for uptime and productivity. Our structured approach ensures that every initiative translates into measurable business results and long-term performance improvements.

PROVEN RESULTS

Mills leveraging the Comact Reliability program have achieved production growth of up to 18% per year, while improving uptime, safety, and team autonomy.

Our integrated offering with EverBlue™ includes:

- **PaaS (Parts as a Service)**: Simplify inventory management with automatic replenishment and guaranteed access to genuine parts.
- **Retrofits**: Upgrade existing equipment to extend lifespan and improve efficiency.
- **On-demand on-site services**: Field expertise deployed whenever and wherever required.
- **Global Learning Center**: Hands-on training for operators and maintenance teams at all skill levels.

Ready to strengthen your mill's reliability?

Contact us today to learn how the Comact Reliability program can help your operation perform at its peak, both now and in the long run.
